Project Design Phase-II Technology Stack (Architecture & Stack)

Date	10 October2022
Team ID	PNT2022TMID16512
Project Name	Plasma Donor Application
Maximum Marks	4 Marks

Technical Architecture:

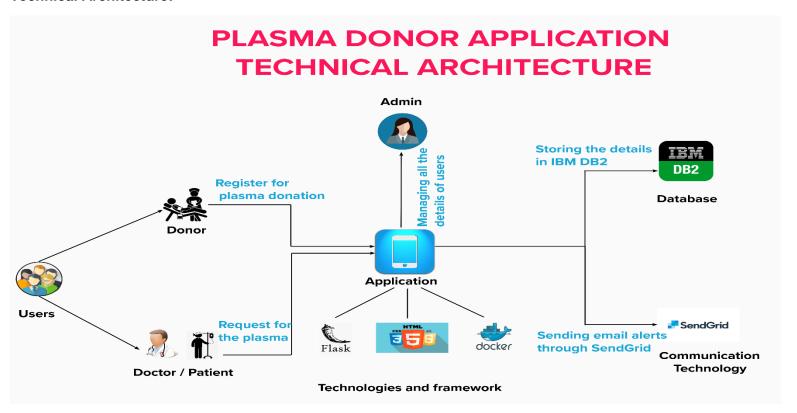

Table-1 : Components & Technologies:

Component	Description	Technology
User Interface	The application interacts with the user using chatbot.	HTML, CSS, IBM Watson Assistant, JavaScript / Angular Js / React Js etc.
Application Logic-1	Framework used for design the application.	Python - flask
Application Logic-2	Communication between users and the application via mails.	SendGrid
Application Logic-3	Storing the details of the users both donors and patients.	IBM DB2
Application Logic-4	Docker is an open source platform for building, deploying, and managing containerized applications.	Docker
Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloudant etc.
File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local Filesystem
External API-1	They make it easier for your developers to store, manage and deploy container images.	Container Registry
Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud	Local, Cloud Foundry, Kubernetes, etc.
	User Interface Application Logic-1 Application Logic-2 Application Logic-3 Application Logic-4 Database Cloud Database File Storage External API-1	User Interface The application interacts with the user using chatbot. Application Logic-1 Framework used for design the application. Application Logic-2 Communication between users and the application via mails. Application Logic-3 Storing the details of the users both donors and patients. Application Logic-4 Docker is an open source platform for building, deploying, and managing containerized applications. Database Data Type, Configurations etc. Cloud Database Database Service on Cloud File Storage File storage requirements External API-1 They make it easier for your developers to store, manage and deploy container images.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	Python – flask is an open-source framework used to develop the application.	Python -flask
2.	Security Implementations	Container registry and Kubernetes Cluster are used for encryption of data.	Container registry and Kubernetes Cluster
3.	Scalable Architecture	Kubernetes Cluster allow containers to run across multiple machines and environments.	Kubernetes Cluster
4.	Availability	Kubernetes Cluster provides all time availability.	Kubernetes Cluster
5.	Performance	Docker improves the application performance.	Docker
